DENVER PLASTIC SURGERY ASSOCIATES

Chemical Peels

Chemical peels are designed to exfoliate the skin for a fresher complexion faster than with traditional skin care. We offer different levels of chemical peels that are chosen by our skin care specialist. Peels are performed to improve fine lines, promote healthy skin growth, clarity and texture, decrease acne and sun damage, while smoothing the overall complexion. Our treatments range from the mildest "lunch time" peel to the more aggressive salicylic peels for the treatment of acne.

Starting at - \$105

Botox

Botox Cosmetic is a non-surgical, aesthetic treatment for moderate to severe wrinkles. Botox Cosmetic works by reducing the contractions of the muscles that cause those persistent frown lines that have developed over time. One 10-minute treatment-a few tiny injections-and within days there's a noticeable improvement in moderate to severe lines. Results can last 4-6 months.

Price per unit - \$14

Microdermabrasion

Microdermabrasion is a great option for anyone who wants a brighter look to their skin. Traditional microdermabrasion utilizes fine crystals to remove the most superficial layers of the skin. The DiamondTome Skin Resurfacing System is another form of microdermabrasion that uses the polishing action of diamond chips and the cleaning action of vacuum to reveal a smoother, more supple top layer of skin.

There is evidence to suggest that the microdermabrasion process promotes the synthesis of collagen and elastin in the dermis, resulting in healthier skin.

Microdermabrasion starts at \$105

DiamondTome starts at \$125

Call about package prices.

Dermal Fillers

Dermal fillers are used to reduce or eliminate wrinkles, raise scar depressions, enhance lips, and replace soft-tissue volume loss. We offer a wide variety of dermal fillers including Juvederm, Perlane, Restylane and Radiesse.

Based on your skincare needs, one of our skincare specialists will be able to help you decide which filler would benefit you the most.

Starting at \$500 syringe

\$300 1/2 syringe

Facials

We offer custom facials to treat acne, aging, stressed, dry or dull skin. Extractions will help clean clogged pores.

Our facials will restore skin health and brighten your day with a fresh, healthy glow. Product infusion and massage techniques will relieve stress to soothe your skin and relax your worries away.

Starting at \$79

Sciton

As we age, the effects of sun damage and environmental pollutants take their toll on our skin, causing it to wrinkle, develop sun spots and look tired. The new Sciton skin resurfacing procedure can reverse these effects and restore a healthy, younger look to the skin, with less chance of damage to the skin compared to Fraxel or CO2 lasers.

There are two approaches to resurfacing: full field, and fractional. In full field resurfacing, called MicroLaserPeel, the entire surface area of the skin is treated. A laser beam is scanned across the treatment area and precisely removes a layer of skin. The body will naturally replace the old, damaged skin that was removed, with a fresh, healthy layer. Treatments can range from shallow (eliminating fine lines, sun spots and tired-looking skin) to deep (used to improve and eliminate deep wrinkles, even in difficult areas like upper lip lines and crow's feet).

In fractional resurfacing, the laser removes pinpoint columns of skin, leaving the surrounding tissue intact. This approach allows the laser to penetrate deeply for effective collagen remodeling, while the surrounding intact tissue promotes rapid healing.

MicroLaserPeel starts at \$550

Profractional starts at \$800

SkinTyte™ by Sciton

SkinTyte treatment uses a broadband of light energy to deeply heat dermal collagen, this starts the body's natural healing process to renew the collagen foundation resulting in firmer skin. The treatment is provided in office and has no downtime, a series of 2-3 treatments a month apart is typically recommended for best results.

Starts at \$350 per area

Intense Pulsed Light

IPL (Intense Pulse Light) treatments can produce remarkable improvement to the skin with minimal risk. IPL will even out the complexion and improve both brown and red conditions such as sun spots, flushing, Rosacea and birth marks. The treatments will also smooth texture of the skin and minimize pore size. IPL specifically rejuvenates the tone in the jowl, forehead and cheek areas. IPL is also used in the removal of unwanted hair.

Laser Hair Removal

For removal of unwanted or unsightly hair, laser hair removal is a great treatment. This technique works well to remove dark, course hair from any body region. Typically requires multiple treatments for lasting results. If you have ever dreamed of not having to shave or wax, this is the treatment for you.
